Notice

Warning Against Misbehaviour with Staff members

It has come to our attention that there have been instances of misbehaviour and disrespectful conduct towards our staff members in the department. We consider such behaviour unacceptable and detrimental to the positive environment we strive to maintain.

Instances of misbehaviour, which may include but are not limited to verbal abuse, harassment, rudeness, or defiance, undermine the trust and mutual respect that should exist between students and staff members. Such actions not only disrupt the learning process but also create a hostile atmosphere that hampers the overall progress of the department.

Failure to comply with good behaviour with the staff members may lead to serious consequences, including disciplinary actions that could negatively impact your academic standing and future prospects. We strongly urge you to reflect on your behaviour and rectify any instances of disrespect or misconduct.

Let us work together to create a supportive and respectful learning community that values the contributions of our teacher and staff members. We believe that by upholding these principles, we can foster an environment that encourages growth, academic excellence, and mutual respect.

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke.

Prof. Basharat Ahmad Wani

Head, Department of Physics
